#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockponds Constructed Prior to 1969"

MR BIGG -

ITS BEEN AWHILE SINCE I TALKED TO  
YOU ON THE PHONE - IM SURE YOU DONT RECALL  
IM INTERESTED IN CLARIFYING THE WATER  
RIGHTS THAT ARE INVOLVED IN A PIECE OF  
PROPERTY IM BUYING. THE ENCLOSED MAPS  
SHOW THE LOCATION OF THE PROPERTY, WE  
ARE DOING A "PROPERTY LINE ADJUSTMENT"  
SO THE RIGHTS WOULD BELONG TO 2  
LOTS; LOT 26 + LOT 27. THE LOT IM  
PURCHASING IS REFERRED TO AS "NEW  
WEST LOT" AND INCLUDES AREAS OF BOTH  
LOTS 26 + 27. I WAS TOLD BY A  
NEIGHBOR WHO IS IN CHARGE OF MAINTAINING  
THE DIVERSIONS IN THE AREA THAT  
"FORTY ACRES" (THE TRACT NAME) WAS  
HOMESTEADED IN 1904 AND THENCE  
SUBDIVIDED OVER THE YEARS, THE STREAMS  
IN QUESTION ARE ACTUALLY DIVERSIONS FROM  
PINE CREEK AND ARE USED FOR GRAZING  
PASTURES AFTER THEY PASS THRU 40 ACRES.  
I AM MAINLY INTERESTED IN SECURING OR  
MAINTAINING ANY SURFACE WATER RIGHTS THAT  
ARE CURRENTLY IN EXISTENCE. ~~I WOULD~~ CAN  
YOU BE OF HELP? I WILL TRY TO CALL  
YOU ~~ON AUGUST~~ SOON IN CASE YOU HAVE  
QUESTIONS OR AN EASY ANSWER OVER THE PHONE -  
THANK YOU - RANDY JEWETT

City of CA Dept of Water and Power has been restricting our flows, we believe illegally

F. Please answer only those questions below which are applicable to your project.

## 1. Conservation of water

a. Are you now employing water conservation efforts? YES ☒ NO

Describe any water conservation efforts you have initiated:

Active ditch management and controlled irrigation

b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)

Reductions in consumptive use:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES NO

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ☐ NO ☒
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)  
 I have data to support the above surface water use reductions due to wastewater reclamation. YES ☐ NO ☐

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ☒ NO ☐ *See attachment*
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)  
 I have data to support the above surface water use reductions due to conjunctive use efforts. YES ☐ NO ☐

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

State of California,  
State Water Resources Control Board  
Division of Water Rights  
VIA FAX 916-341-5400

Dear DWR,

We are only able to provide estimates of our water usage at this time. All of the prior reporting made by us was also only inexpert estimates. There now exists, for the first time, devices and personnel that should allow us to be more accurate in the future.

Please note that in the DWR description of our rights that we are posted at 2.5 cfs+-(plus or minus). We were advised that this number was an estimate of the carrying capacity of our ditch. We have done extensive historical research and measured our ditch capacity and have determined that flows of over 4 cfs have come through our system in the past and that the normalized flow is well over 2.5 cfs. We can provide evidence to show that the higher flows are part of a historic and customary use program.

Currently we are involved in a dispute with the City of Los Angeles Department of Water and Power (LADWP). The issue is whether the LADWP has the right to usurp our 1866 Ditches and Canals rights on Federal (BLM) land and control our water flows. The case is now before the BLM area manager, Mr. William Dunkelberger, and we expect to see his report soon.

If we are granted the rights to control the water, which we believe are ours, then we intend to begin an inventory of usage and will use the measuring systems recently installed to be more accurate in our flow and usage rates reporting.

We have compiled a significant collection of documents, maps, photographs and testimony concerning our water situation. We will provide access to these documents to interested parties upon request.

If the faxing of these documents is insufficient to meet our reporting requirement, please advise us at your soonest convenience.

Respectfully Submitted:

Thaddeus W. Taylor  
President of the Board, 40 Acres Homeowners' Water Association

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1988. (Additional information on reverse side of this form.)

A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☐ Gallons  
☒ Acre-feet  
☐ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1985	All												219
1986	"												"
1987	"												"

B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 40 acres

Stockwatering 40 acres

Domestic 6 families - rest on wells - 40 ac.

Other (specify) Fire protection - 40 Ac

C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

None

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.
